Annex 9

ON SAFETY OF MACHINERY AND EQUIPMENT

LAW OF THE REPUBLIC OF KAZAKHSTAN NO. 305 of 21 JULY 2007

- 8) designer of the machine (or) equipment (henceforth designer) a natural or juridical person elaborating sitten documents and operating manuals for machinery and (or) equipment;
- 9) life cycle of machinery and equipment processes of designing, manufacture, operation (including repairmaintenance and servicing), storage, transportation, selling, destruction and utilization;
- 10) safety of machinery and equipment the absence of an inadmissible risk related to inflicting of harm to life, health of a man and environment;
- 11) subjects responsible for safety of machinery and equipmentlesigner, a manufacturer, an authorised representative machinery and equipment;
- 12) conformity assessment of machinery and equipment procedure, the result of which is document of the conformity sessment (in the form of a conformity declaration or conformity certificate) of machinery and (or) equipment with requirements established by technical gulations, regulatory documents for standardisation or terms of contracts;
- 13) conformity declaration of machinery and equipmenta document by which the manufacturer certifies the comfitty of machinery and (or) equipment released for circulation with established requirements;
- 14) manufacturer a natural or juridical person which manufactures machinery and (or) equipment;
- 15) user a natural or juridical person performing operation of a machine and (or) equipment;
- 16) personnel (operators) persons engaged in setting up, operation, adjustment, maintenance, cleaning, repair, storage or transportation of machinery and equipment;
- 17) conformity symbol a mark to inform buyers that machinery and (or) equipment passed the procedure of conformity assessment;
- 18) authorised body a state body performing administration and coordination of activities of other state bodies ensuring fety of machinery and equipment in accordance with the sector direction within granted authorities;
- 19) authorised representative a natural or juridical person having authorities in writing from the manufacturer allowing to conduct (carry out) trading on its behalf;
- 20) marginal state a state of machinery and equipment under which their further operation or restoration of thestate of operability are impossible or inexpedient;

21) failure •

- 1. The common state system of bodiessuring safety of machinery and equipment shall be composed by:
 - 1) the Government of the Republic of Kazakhstan;
 - 2) the authorised body in the field of industry and trade;
 - 3) the authorised body in the field of emergency situations;
 - 4) the authorised body in the field of agriculture;
 - 5) the authorised body in the field of energy and mineral resources;
 - 6) the authorised body in the field of transport and communications.
- 2. The authorised bodies indicated in subparagraphs(2) f paragraph 1 of this Article shall perform state regulation in the sphere of safety of machinery and equipment in accordance with sectoral directions.

Article 5. The Scope of the Government of the Republic of Kazakhstan

The scope of the Government of **Republic** of Kazakhstan shall comprise:

- 1) elaboration of the state policy in the field of safety of machinery and equipment;
- 2) approval of technical regulations in the field of safety of machinery and equipment;
- 3) inter-sectoral coordination of activisient the state bodies ensuring safety of machinery and equipment.
 - Article 6. The Scope of the Authorised Bodies Ensuring Safety of

- 4) state control and supervision of new liance with requirements established by this Law and technical regulations in the lot of safety of machinery and equipment, within their scope;
- 5) elaboration, approval or coordination regulatory legal acts in the field of safety of machinery and equipment, except for approval of a technical regulation;
- 6) monitoring of the consumer market for the purposes of exposure of machinery and equipment inconsistent with requirementshis Law and technical regulations in the field of safety of machinery and expression, and elaboration of measures for non-admission of them for selling;
- 7) issue of an instruction concergi suspension of manufacture, selling and circulation in the market of machinery and equipment inconsistent with safety requirements established by this Law and technical regulations.
- Article 7. Rights and Obligations of Subjects Responsible for Safety of Machinery and Equipment
- 1. Subjects responsible for safety of machinery and equipment shall have the right:
- 1) to receive in time reliable informian on the conformity of machinery and equipment with safety requirements established by this Law and technical regulations;
- 2) bring to authorised bodies a petition concerning the inconsistency of machinery and equipment with safetyquierements established by this Law and technical regulations.
- 2. In addition to the rights stiputed by paragraph 1 of this Article, the manufacturer shall have the right:
- 1) to participate in elaboration **c**egulatory legal acts in accordance with the legislation of the Republic of Kazakhstan;
- 2) to elaborate and approve organisms standards to be consistent with obligatory requirements of the legislation to be Republic of Kazakhstan in the field of safety of machinery and equipment;
- 3) to elaborate industrial control programs for safety of machinery and equipment;
- 4) to introduce systems of managementuality and safety of machinery and equipment;
- 5) to restore (repair) or to change (modernize) considerably, to distribute machinery and (or) equipment.

- 3. Subjects responsible for safety of machinery and equipment shall be obliged:
- 1) to comply with requirements of the gislation of the Republic of Kazakhstan in the field of safety of machinery and equipment;
- 2) to collaborate with the authorised bodies on issues of prevention or decrease of risks related to machinery and equipment.
- 4. In addition to the obligations stipated by paragraph 3 of this Article, the manufacturer shall be obliged:
- 1) to present documents certifying thatefety of machinery and equipment to users, as well as to the authorised bodiessuring safety of machinery and equipment, upon their request;
- 2) to provide machinery and equipm with an operating manual and other information in the State and Russian languages, which is necessary to the user to evaluate potential risks and to undertake appropriate safety measures;
- 3) to ensure control over safety of chinery and equipment in the processes of designing, manufacture, storage and trantation, as well as in cases of repair, maintenance and servicing, modernization and distribution, in which it participates;
- 4) to check users' complaints concerning the inconsistency of machinery and equipment with safety requirements established by this Law;
- 5) to stop immediately processes of mathemature of machinery and equipment in the event when a violation has been monthated which resulted in the acquisition by them of dangerous properties, to ensure-call of them from buyers (users) and conducting of an expert examination, after thout indertake measures for elimination of the violation or, if necessary, to organise their utilization or destruction;
- 6) to ensure the possibility of idefication of danger of machinery and equipment on the stage of their selling, storage, destruction and utilization;
- 7) to ensure timely and effective wargiof the user, as well as undertaking of necessary measures up to re-call of mædyirand equipment in case of establishment of their inconsistency with safety requirements established by this Law and technical regulations.
- 5. Besides the obligations stipulated paragraph 3 of this Article, the authorised representative shall be obliged:
- 1) to present documents certifying thatety of machinery and equipment to users, as well as to the authorised bodiessuring safety of machinery and equipment, upon their request;
- 2) to check users' complaints concerning the inconsistency of machinery and equipment with safety requirements established by this Law;

- 3) to ensure control over safety of achinery and equipment in the process of their selling, storage and transportation;
- 4) to ensure a possibility of identifican of danger of machinery and equipment on the stage of their selling, storage, transportation;
- 5) to ensure timely and effective wargiof the user, as well as undertaking of necessary measures up to re-call of mædyirand equipment in case of establishment of their inconsistency with safety requirements established by this Law and technical regulations and being dangerous to life and health of people, environment.
- 6. Besides the obligations stipulated payagraph 3 of this Article the importer shall be obliged:
- 1) to check users' complaints concerning the inconsistency of machinery and equipment with safety requirements established by this Law;
- 2) to ensure control over safety of chinery and equipment in the process of their selling, storage and transportation;
- 3) to ensure a possibility of identifican of danger of machinery and equipment on the stage of their selling, storage, transportation;
- 4) to ensure timely and effective wargiof the user, as well as undertaking of necessary measures up to re-call of mædyirand equipment in case of establishment of their inconsistency with safety requirements established by this Law and technical regulations and being dangerous to life and health of people, environment.
- 7. Besides the obligations stipulated paragraph 3 of this Article, personnel (operators) shall be obliged:
- 1) to inform the authorised bodiesnmediately of violations of safety requirements established by this Law and the cal regulations in relation to machinery and equipment released in circulation, which resulted in acquisition by them of dangerous properties in the process of diperatransportation, storage, destruction and utilization, and of measures undertaken by them;
- 2) to ensure control over safety of an inery and equipment in the process of their operation, destruction and utilization.
- 8. Besides the obligations stipulated by paragraph 3 of this Article the user shall be obliged:
- 1) to inform the authorised bodiessmediately of violations of safety requirements established by this Law and numberal regulations in relation to machinery and equipment released in circulation, which resulted in acquisition by them of dangerous properties in the process of diperatransportation, storage, destruction and utilization, and of measures undertaken by him;

- 2) to ensure control over safety of chinery and equipment in the process of their selling, storage, transportation, destruction and utilization.
- Article 8. State Control and Supervison in the Field of Safety of Machinery and Equipment
- 1. State control and supervision **tine** field of safety of machinery and equipment shall be implemented by thethauised bodies in accordance with the procedure and within the limits of their scope established by legislative acts of the Republic of Kazakhstan.
- 2. State control and supervision **the** field of safety of machinery and equipment shall be performed in the form of sheduled and non-scheduled inspections.
 - 3. The scheduled inspection shall be conducted not more than one time per year.
- 4. The non-scheduled inspection shall conducted when the authorised body ensuring safety of machinery and equipment has received information:

- 7. When inspecting the risk evaluation the authorised body shall deliver machinery and equipment or their certapiarts to a testing laboratory (centre) accredited by the body for accreditation in the displaying tests (researches).
 - 8. The program of risk evaluation shall be elaborated by the authorised body.

Chapter 2. SAFETY REQUIREMENTS TO THE MACHINERY AND EQUIPMENT

Article 9. General Requirements to Esuring of Safety of Machinery and Equipment

- 1. Machinery and equipment, which are covered by this Law, shall be consistent with requirements ensuring satetylife, health of a man and protection of the environment established by this Law and technical regulations.
- 2. In the event when machinery and important are covered by several technical regulations, for such machinery and equiptrienshall be necessary to comply with requirements of all the technical regulations, which they are covered by.
 - 3. Safety of machinery and equipment shall be ensured by:
- 1) compliance with requirements the legislation of the Republic of Kazakhstan in the field of safety of machinery and equipment;
- conformity assessment of machinany equipment with requirements of the legislation of the Republic of Kazakhstan tine field of safety of machinery and equipment;
- 3) application of state regulation meassuin the field of safety of machinery and equipment.
- 4. On all the stages of the life cy**cle**machinery and equipment a possibility of control over fulfillment of all the safety requirements established by this Law and technical regulations shall be ensured.
- 5. When a complex of tests is to community and equipment to ensure safety must be conducted in the complete volume with fulfillment of all the requirements of the design documents.

- 6. Deviations from terms of the safe of machinery and equipment stipulated by design documents on all the stages **e**f ltfe cycle of machinery and equipment shall not exceed the allowed risk level.
- 7. The further use of modernized machinery and equipment according to the intention shall be possible only according *esults* of the expert examination certifying the conformity of machinery and equipment w

- 7. Design documents shall comprise a technical description, detailed drawings of machinery and equipment, controllechanisms, operating characteristics of machinery and equipment, operating manual.
- Article 11. Safety Requirements to Machinery and Equipment in Production
- 1. In production it shall be necessary to une the consistency of the process of manufacture of machinery and equipment we quirements of the design documents, this Law and technical regulations.
- 2. In production of machinery and experient the manufacturer shall be obliged to implement the whole complex of measufress ensuring of safety and protection of the environment as determined by the design documents.
- 3. In production a possibility of control over fulfillment of all the technological operations, which safety depends on, shall be ensured.
- 4. The operating manuals shall be be traited in production of machinery and equipment.

The operating manual shall include:

- 1) instructions for assemblage, mounting, setting up or adjustment;
- 2) instructions for regular use of ethmachine or equipment and measures for ensuring of safety, which must be obsert in operation (including commissioning, use according to the direct destination, maintenance, all types of repair and technical examinations, protection means directed to decreasing intensity and localisation of harmful industrial factors, transportation and storage conditions);
 - 3) set indicators of the life time and (or) set resource;
- 4) list of critical failures, probablermers of personnel (user) resulting in an incident (accident), and actions preventing said errors;
 - 5) criteria of marginal states;
- 6) instructions concerning transposition, storage, for putting out of operation, destruction and utilization;
 - 7) requirements to personnel.
 - 5. All the machinery and equipment shall have clear and non-washable marking

- 1) name of the manufacturer and (or) its trade mark;
- 2) name of the machine and (or) equipment, designation of the series or type, number:
 - 3) general indicators of destination and terms of application;
 - 4) date of manufacture.

All the marking symbols shall be explained in the operating manual.

- 6. Machinery and equipment shall have cessary warning records or symbols concerning dangers, where it is stipulated by technical regulations.
- 7. Materials and substances applied for machinery and equipment shall be consistent with requirements established by technical regulations.
- 8. Contents of technical documents certain types of machinery and equipment shall be established by technical regulations.
- 9. The manufacturer, authorised repentative shall be obliged to keep technical documents within ten years from the moment of manufacture of machinery and equipment or from the moment of manufacture of the last sample of the machine and equipment in case of series production.
- Article 12. Safety Requirements in Transportation and Storage of Machinery and Equipment
- 1. Transportation and storage of machinery and equipment shall be performed in conditions ensuring their safety in accordanvith requirements of the legislation of the Republic of Kazakhstan in the field of safety of machinery and equipment.
- 2. Persons performing transportation, as general of machinery and equipment, their units and parts shall make a risk evaluatiaking into account all the requirements in relation to safety as stipulated by the signer, accepted technological processes and terms in case of transportation and storage.
- 3. All the necessary requirements to uning of safekeeping of machinery and equipment in the process of their transption and storage, presentation of technical characteristics causing their safety, in particular requirements to package, terms of transportation and storage, stated dates to date and dates to dates.

examination of the conditions, replacement of a relements, parts, units with expired shelf life, shall be stipulated in the technical documents to machinery and equipment.

4. Loading, unloading, transportation dastoring of machinery and equipment shall be conducted by trained personnel in compliance with safety requirements.

Article 13. Requirements to Machinery and Equipment in Placement and Circulation in the Market

1. Machinery and equipment manufacture the territory of the Republic of Kazakhstan or imported into the territory to Republic of Kazakhstan shall not be sold in the market if they can inflict harton life, health of a man and environment.

Advertising products or other information on machinery and equipment, which misleads users with regard to their safetyd functional destination, provided that they are properly installed, serviced, operatestopred, destroyed, utilized, shall not be allowed.

- 2. The manufacturer, authorised representative, and, where they are absent, person placing machinery and equipment subject to obligatory conformity assessment, in the market of the Republic of Kazakhstanall be obliged to undertake measures to assess their conformity in accordance widequirements of this Law and technical regulations.
- 3. Machinery and equipment having no documents certifying their conformity with requirements of this Law and techali regulations shall not be placed and circulated in the market.
- 4. Equipment designated for instalbati in another machine, which can not function separately, shall be accompanible amanufacturer's declaration under the form established by the appropriate technical regulations.

Article 14. Requirements Ensuring Stety in Assemblage, Operation and Repair of Machinery and Equipment

- 1. When assembling, operating, repairing the machinery and equipment, compliance with requirements of technical regulations, design documents to the system and operating manual to machinery and equipment, shall be ensured.
- 2. Where modifications are introched to the design of machinery and equipment, it shall not be allowed to reduce safety requirements established in their technical documents.
- 3. A person repairing a machine or equipment shall be obliged to fulfill the whole complex of measures determined the design, which ensures safety of machinery and equipment as establishey the manufacturer in the technical documents.
- 4. After the assemblage or repair to machine or equipment the operator (personnel) shall make a risk evaluation and equipment if it is stipulated by the technical documents to appropriate types of operations.

Repaired machinery and equipmentoins is tent with technical documents may be used in case if they meet the technical regulations.

Article 15. Requirements to Cessation Manufacture, Selling, Circulation of Machinery and Equipment in the Market

- 1. From the moment of exposure of tinconsistency with safety requirements established by this Law and technical regulation on the base of the directive of the state body, the manufacturer, authorised repressive, importer and user of dangerous machinery and (or) equipment shall belighed to cease immediately processes of manufacture, selling and circulation.
- 2. Failure to undertake measures stipulated by paragraph 1 of this Article shall entail the responsibility in accordance with laws of the Republic of Kazakhstan.

Chapter 3. CONFORMITY ASSESSMENT PROCEDURES

Article 16. Conformity assessment

- 1. Conformity assessment of machinand equipment shall be conducted in accordance with the legislation of the pablic of Kazakhstan concerning technical regulation.
- 2. The document in the sphere **on** formity assessment issued by a foreign state shall be considered as valid in the Republic of Kazakhstan provided that it is recognised by the state technical regulation in accordance with the legislation of the Republic of Kazakhstan concerning technical regulation.

Article 17. Technical Regulations in the Sphere of Safety of Machinery and Equipment

Technical regulations shall establish safety requirements to machinery and equipment, procedures for conformity assert, forms and contents of technical documents, list of dangerous types of machinery liable to conformity assessment.

Chapter 4. FINAL AND TRANSITIONAL PROVISIONS

Article 18. Responsibility for Violation of the Legislation in the Field of Safety of Machinery and Equipment

Violation of the legislation of the Replito of Kazakhstan in the field of safety of machinery and equipment shall enterisponsibility established by laws of the Republic of Kazakhstan.

Article 19. Transitional Provisions

- 1. Before enactment of appropriatechnical regulations and standards harmonised with them state regulationals to conducted in accordance with the legislation of the Republic of Kazakhstan in the part not contradicting this Law.
- 2. For machinery and equipment being manufactured and put into operation before the enactment of this Law documentstifying their conformity shall be valid within the term indicated in them.
- 3. For machinery and equipment put integration before the enactment of this Law and subject to obligatory conformits sessment, where they are put for free

circulation repeatedly in the territory to Republic of Kazakhstan after the enactment of this Law, the obligatory conformity assessment shall be conducted according to requirements of the legislation of the Public of Kazakhstan concerning technical regulation.

Article 20. The Procedure for Enactment of this Law

This Law shall be enacted from 1st January 2008.

President of the Republic of Kazakhstan
