

Animal Herd Equilibrium year 2000

Statistic for equilibrating animal herd

The statistic is based on data provided by provinces in the Animal Herd Equilibrium Conference (25-27 February 2000) at Vientiane Prefecture and from agricultural census data of the year 1999 of the Statistics Division, Ministry of Agriculture and Forestry. Some provinces use data reported by district offices.

Animal	% female in herd	% produce	Production capacity	% death	average weight in herd (kg)	weight of those sloughed (kg)	weight edible (%)	off spring per birth	No. of birth per year
--------	---------------------	-----------	---------------------	---------	-----------------------------------	-------------------------------------	-------------------------	-------------------------	--------------------------
