The administered price and the external price is calculated from the price for potato starch and a starch content of 17 per cent in the potato for processing.

During the period a "2-price-scheme" was applied. The in-quota price and quantity is used here

In millions  
(Value of gross production  
1986/88 = 49 Million SEK)

These grants are paid both in the form of average grants and price supplements. It can be argued that they should be excluded from reduction since they are necessary for food security reasons.
